Train your team
Improve your testing skills

Business Analysis, Testing,
User Experience, Project Management

Training catalogue

q-leap's Training suite is focused on Software Quality Assurance, our core expertise. Our portfolio includes certified full program training and small module training developed by our testing specialists and more thorough in some areas of testing. Our training courses are designed for the entire lifecycle of digital product development, from conception to maintenance, allowing you to sharpen your skills in activities such as:

- Business Analysis,
- Project Management,
- Testing methodologies and tools,
- Usability Engineering

We are an ISTQB Partner, an accredited exam centre. We also have the accreditation to be a training centre.

Our training offering doesn't stop at our training catalogue. We continuously enhance our training solutions based on the experience acquired during our clients' assignments to remain relevant to the market and ultimately to you.

Did you know? The legislation on continuing vocational training enables companies that are legally established in Luxembourg to benefit from financial assistance for their training plans.

Please see the price list attached or contact us to receive it.
