What does Virtual training mean for QRP?

Q of QRP stands for quality which means that we have worked hard on developing a virtual classroom service up to the standards you are used to receive from us. We are aware that the Virtual classroom format brings challenges and therefore our operations department has been working hard to develop a great learning experience for you.

We have chosen a state-of-the-art software systems including AI driven exam simulations to support our trainers in their online live delivery. We would like to remark that the main driver has been one of our company core values:

We do our utmost to make our clients happy: This is the reason why we have not simply switched the traditional onsite courses in virtual training by asking you to sit for 8 hours during 3-5 days in front of a monitor. According to us, that would not have made You happy. Plus it is not in line with our quality standards.

6 reasons why you're gonna love it

1 Live expert instruction

The trainer is live and can answer any of your questions in real time. You can communicate with the instructor both electronically and verbally in our live online training, interacting just as you would in the classroom.

2 Keep the learners engaged

We use **tests** to evaluate knowledge retention during the session and get immediate feedback with **polls**.

3 Peer Interaction

Even in this virtual, live online training environment you will gain valuable knowledge interacting with your peers in class, in our breakout sessions, and during course lectures

4 **Course material**

Participants will be provided with a high-quality version of the course materials in an electronic/digital format. Materials are provided to students upon registration for their class.

5 **MemoTrainer™**

Effective learning, train the memory. It helps the learners remember what we have taught them.

6 **Adaptive learning**

We say no to "one-size-fits-all" and adapt courses to each learner. Delegates could skip here and there along the learning journey and they could recover in other moments parts of the webinars and all the documents.

The use of MemoTrainer helps to store what they learned in their long-term memory.

- Online Classroom Webinars
- Breakout exercises with case study
- Real life discussion
- Homework & self study
- Online test examination and online answer discussion

- **Webinar:**

5 morning or afternoons sessions of 3.5 hours.

Breaks included!

- **Homework & self study:**

+/- 1 hr 30' min. in the afternoon /evening

- **Exams are included !**

Exam will take place online thanks to the remote ProctorU technology which is a remote online Exam Invigilation service. Exams can be taken 24 hours a day, seven days a week, using a webcam and a reliable high-speed internet.

...But we are flexible, the course can be planned differently!

- Online Pre-reading
- Online Material : hand-outs of the presentation (PDF)
- Webinar will be recorded
- QRP aNewSpring eLearning platform
- Exercises case study
- Exam sample questions
- Templates
